

BCGA CP7 GAS INSPECTION COURSE

2 day Gas Inspection Course or 1 day Refresher Course.

OVERVIEW

Weldability Sif deliver the only CP7 gas inspection courses supported by Hiscox Professional Indemnity Insurance - providing a complete training and certification service to enable those with a basic understanding of the Oxy/Fuel Gas Welding process to inspect portable Oxy/Fuel cutting and welding gas equipment in accordance with the Provision & Use of Work Equipment Regulations 1998 and the British Compressed Gases Association Code of Practice 7 (BCGA CP7). Our course will certify you for 3 years.

Already Certified?

The 1-Day Refresher Course covers those who have been certified to other schemes within the last 3 years, looking to renew their certification and convert to the Weldability Sif Scheme. Inspectors unable to provide proof of attendance must attend the two day Inspectors Course.

WHAT DOES THIS QUALIFICATION COVER?

- Hazards of gases
- Incident case study
- Cylinder identification
- Hazards of oils greases & PTFE tape
- Pressure
- Oxygen enrichment & deficiency
- PPE
- Emergency Procedures
- Manual Handling
- Storage & Transport
- Regulators
- Backfires & Flashbacks
- Torches, Nozzles, Hoses
- Pressure Systems Regulations
- Practical procedures mobile oxy-fuel systems
- Safe set up & shut down
- Annual inspection
- Test & response papers

Training is designed to qualify Inspectors to conduct full gas safety checks on individual oxy-fuel gas welding systems and is covered over a two day period.

Day one of the course involves classroom instruction on oxy-fuel gas safety, the properties of gases, safe use and operation of systems.

The second day of the course is devoted to practical training. Through hands-on instruction, candidates are taught how to fully test an oxy-fuel gas station and pass it off for safe use. Instruction is also provided on risk assessment of stations according to current legal requirements.

Once qualified, you could provide a chargeable Gas Equipment Inspection Service and will have the knowledge to advise if replacement equipment is necessary and then supply, recouping your investment over just a few calls.

Upon passing the course, successful delegates will receive a certificate, identity card and a comprehensive inspection pack, including tool kit.

CERTIFICATION

Successful candidates will receive:

EAL Certificate of Verified Achievement

Compressed Gases Safety Passport to HSE INDG 381

WELDABILITY PI. PROFESSIONAL INDEMNITY INSURANCE

Weldability PI is a professional indemnity insurance which will enable you to offer your customers a chargeable Gas Inspections service and help protect you against unforeseen circumstances that may arise during this process.

Usual PI policy premiums start from £3,000 and it often relates to turnover. Weldability Sif offer a co-operative scheme where successful candidates of our Gas Inspection Courses can provide a written scheme and tagging service.

Our scheme costs only £190 per annum for the Company and £95 per individual inspector paid annually up to your re-certification in 3 years time. This amount is payable in addition to the certification fee.

Weldability PI is backed by Hiscox Insurance, a major Insurance Company and offers complete peace of mind exclusively to Gas Inspectors successfully trained under the Weldability scheme.

No other company offering similar CP7 Gas Inspection courses can support and protect you in this way. Should this be of interest to you, simply complete the WELDABILITY PI application form and return it to gasservice@rhg.co.uk at your earliest convenience and they will confirm when the Policy has been activated. The scheme can be paid monthly by direct debit interest FREE.
